Re: Letter of Recommendation

To Whom It My Concern

I am writing this letter to attest to the continued satisfaction that I have experienced with D.P. Electric, Inc. I am impressed with Scott Muller and any team that he assigns to any of our projects. In today's fast paced construction industry it is not enough to be just reactive to problems or issues. One of the major things that sets Layton apart from other general contractors, is we are known as a proactive general contractor. D.P. Electric, Inc is also known in the construction community as a subcontractor that is proactive. This is just one thing that sets companies apart from our competition. Another is team work. D.P. Electric, Inc. is truly a team player. I feel Scott and his staff are superior to most in the electrical contracting community. They always exhibit a professional and approachable attitude through the pre-construction and construction phase. They have always been proactive to meet value engineering needs, schedule, budget, and quality and warranty goals on our projects.

I look forward to working with the D. P. Electric, Inc. on the next project. I know it will be highly successful. We would highly recommend using D.P. Electric, Inc

Sincerely

*Charles Armstrong*
