

February 2009

United States Census 2010 Processing Facility

Location : Avondale, Arizona, USA

Distributor : HD Supply Electrical

Contractor : D.P. Electric

Products : 5,450 feet of CF54/300EZ & CF54/600EZ was ceiling mounted, using threaded rods, FAS Profiles, FS41s in Black, EZT90Kits, and HB2Kits

The Census 2010 project is a major project that is 450,000 sq.ft for the United States Government. This facility, formerly owned by Revlon Cosmetics, will become the southwest United States' processing center for the next U.S Census beginning in 2010.

Allied Group Sales worked closely with D.P. Electric, Arizona's 5th largest electrical contractor, to specify Cablofil as the most cost effective method to run electrical & data cabling. Allied successfully converted this project from Cooper B-Line ladder tray to Cablofil basket tray because Cablofil offered all the flexibility needed, as well as efficient tray widths for this remodel project. Cablofil accommodated for bending, twisting, & terminating, and was cost effective & quick to install, in comparison to conduit. Cablofil also complimented the requirement for the use of MC cabling & installation went smooth and ahead of schedule.

CABLOFIL – Innovate to meet or exceed our customers' expectations

Agency: Rick Jacobsen, Allied Group Sales, Phoenix, AZ, USA
